

**September 12, 2016**  
**Immediate Release**

**PUBLIC WORKSHOP**  
**Wastewater Treatment Facility Upgrade**

The Town of Warren will be hosting a public workshop on **Tuesday, September 27 at 6:30 PM** in the Council Chambers, Town Hall, 514 Main Street. All are welcome to attend this update on the status and progress of plans for the upgrade of the wastewater treatment facility. The upgrade is necessitated by water quality concerns and an inability to meet clean water standards under the existing facility operations. Approval for funding for the project will be presented to the voters as a referendum item on the November 8, 2016. If approved, construction would begin in Fall, 2017.

The project engineer, Woodard & Curran, and Town staff will be present to update the public on the project and to answer questions. Topics of discussion will include a refresher on the legal and regulatory background, status of engineering and design, the value engineering process, flood resilience and environmental issues, as well as the current schedule to get to construction. We invite and encourage the public to attend to learn more about this important project.
